What kind of company is NVIDIA?

INVESTMENT / ECONOMY / BUSINESS

Core business

Provides high-speed computing infrastructure for AI training and inference. Its offerings include GPUs, networking and software.

Main products

GeForce: gaming GPUs.
Data centers: AI GPUs and systems.
DRIVE: a platform for autonomous driving and in-vehicle AI.

Competitive strengths

Software development environments such as CUDA. Communication technology connecting large numbers of GPUs is another strength.

What investors should watch

Cloud companies’ capital expenditure, competition and export controls. Also watch supply constraints and share-price levels.
TODOROKI | Investment and economics: numbers before intuition.
