To-do lists | Managing action

INVESTMENT / ECONOMY / BUSINESS

What is a to-do list?

A tool that lists what needs doing and helps you act. It prevents forgotten tasks and helps organize priorities.

Four basic fields

Task name, deadline, priority and completion checkbox. Break large goals into concrete actions.

Typical uses

Daily: today's actions. Deadline-based: managing due dates. Routine: managing daily and weekly habits.

How to keep using it

Choose “check P/E ratios for 30 minutes” rather than “study stocks.” Use paper or an app, whichever is easy to review.
